

## How orange juice is prepared

Hints:- oranges bought from market-- sorted and rotten once removed-- cleaned and peeled -- put in juicer-- juice extracted-- sugar and preservatives added-- poured in bottles and sealed-- ready to be sold.

Answer:- Orange juice is a very palatable and popular drink. It can be prepared through some easy steps. At first some oranges are bought from the market. Next those are sorted and the rotten ones are removed. The fresh oranges are cleaned in water. Then the clean oranges are peeled. After that the oranges are put in juicer and juice is extracted from the juicer. Next some sugar and preservatives are added to the juice. Thus orange juice is ready and poured in bottles and sealed. Finally orange juice is ready to be sold in the market.
